IV. RESEARCH AND CREATIVE ACTIVITY

A. INTERESTS AND SPECIALTIES:

Drawing and Painting from observation; oil on canvas, charcoal, and other drawing media. Investigation of the perception of light and color through painting and drawing from observation with a particular emphasis on still life and the figure.

B. CURRENT RESEARCH PROJECTS:

Investigation of space and geometric form through observation of the still life. I am particularly interested in how light, space and representation of specific objects may work together to imply a narrative. I am also considering the impact of work which has a presence of being life sized. I am interested in this for both the experience of the viewer as well as my own.

From my participation in the exhibition "...and I am blue...", fall 2007. I have a tentative potential offer for an exhibition of new still life paintings from Alison Hatcher at the Mclean County Arts Center. Still life submitted to this exhibition was collected by the curator.
