VII. TEACHING EXPERIENCE

A. Teaching Interests and Specialties:

My teaching interests and specialties encompass a wide range of anthropological topics, with a focus on evolution and its implications across various domains. My expertise includes biological anthropology, primate evolution, primate behavioral ecology, primate cognition, primate conservation, primate communication and the methods used in both field and lab-based primatology. I am also interested in human evolution and the human fossil record. Additionally, I have a strong interest in the history of Germany, specifically the period from 1933-1945.
